

INTRODUCTION

ROASTED GUAR KORMA MEAL:

Roasted Guar Korma, is an ideal source of protein for animals, Guar korma contains most of the germ part of guar seeds and is a complete non GMO plant. Essence of required amino acid profile, high energy & protein makes it most founded animal feed supplement. In order to get the roasted form of Guar Korma, with heat & steam it needs to be processed, during this process harmful trypsin inhibitor present in Guar Korma get removed; indirectly amino acid profile & ratio of protein enhanced in the product. This process reduces (Hydrolysing glactomannan) gummy substance of Guar Korma and breaks cell walls which results into the higher digestibility level of guar korma. Therefore, being free of all antinutritive factors it becomes most required source of protein for Ruminant, Poultry, Aquaculture and Swine. We use all advanced technical machineries and hygienic handling of the product throughout the manufacturing process which make us different from other Roasted Guar Korma manufacturers.

ADVANTAGES:

- Rich in protein value.
- Absence of Anti nutritive factors.
- Provide higher digestibility index.
- Balanced Amino Acid profile.
- 100% non-GMO product.
- Increased productivity.
- Nominal cost.

SPECIFICATION:

- Moisture : 5 %Max
- Protein: 57 % Min
- Sand / Silica: 1% Max
- Fiber: 4-5 % Max
- Oil (Fat) : 6% Min
- Ash: 4% Max
- Packing: 50 kg Bags
- No Melamine, No Aflatoxin

Corporate Office :
41, 5th Floor, Shree Krishna Center,
Near Mithakhali Six Road,
Ahmedabad-380 009, Gujarat, India.

APPLICATIONS:

POULTRY FEED:

Roasted Guar Korma is high protein poultry feed stuff, which help in increasing productivity & growth. Roasted Guar Korma is a product made from the guar seed (Cyamopsis Tetragonoloba), a leguminous plant. Through a mechanical milling process Guar Korma get separated from Guar Splits (endosperm) of the guar seeds, than guar korma has been roasted at high temperatures to remove the natural trypsin inhibitor in order to enhance its nutritive value and digestibility.

DAIRY ANIMALS:

Roasted Guar Korma is valuable cattle feed as it is rich in protein and have high digesting content, which improves digesting system of cows or buffaloes. As it is very high in protein it gives extra fat in the milk of dairy animals and also increases the quantity of milk.

FISH FEED

Protein is the most expensive & important part of fish feed, it is important to accurately determine the protein requirements for fish. Due to the delicate digestive systems of fishes their feed must have high digestive content. Roasted Guar Korma not only is a good source of protein but also has balanced amino acid profile which helps to promote optimal growth and health
